

# ENERGY EFFICIENCY AT AIRPORTS & AVIATION

- save on recurring energy costs
- stabilize your energy buying prices
- enhance your technical systems performance & stability
- improve your energy & climate footprint

YOUR sustained success is our aim !

## SITUATION-ANALYSIS & ENERGY PERFORMANCE INDICATORS

Improvement starts with comprehending and quantifying sensibly your energy use as-is-situation, technically, financially & in the regulatory frameworks.

An Energy Audit will compile both the data on energy consumption and the relations to its use in your productive processes.

Qualifying the productive energy use leads to the development of energy performance indicators – your future control instruments to manage your energy efficiency.

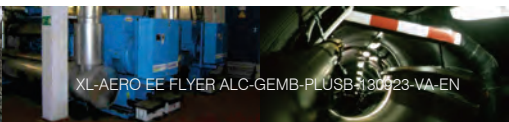

Your aviation business focus drives our compilation of this energy analysis, combining expert understanding of both.

## ENERGY PLANNING FOR OPERATIONS

Energy use can be regarded in many different settings – from the very encompassing to the very focused. You as airport or aviation operator give to us the limits on scope and framework.

- On the basis of ISO 50001:2011 your individual Energy Management System can be developed by us.
- Your specific energy use improvement projects can be supported or managed by us.

Your instruments of continuing improvement of energy efficiency are our focus of expertise.

you talk ⇌ we listen ⇌ we act ⇌ you benefit

## PROGRAM DEVELOPMENT

Your strategic and operational energy targets and action plans can be prepared, decision ready, by us. Your optimized energy business & investment models, are their foundation, and we stand ready to assist you in developing these.

Developing and implementing your energy action program is our task.

## PROJECT MANAGEMENT

Project execution is a key part of achieving performance success. For you we can lead it with the benefits of our long-term experience of successful energy & aviation project completion.

Working to your control & information needs is our must-be met guideline to client satisfaction in project execution.

# ENERGY EFFICIENCY SPECIALISTS

**Airport Functions & Systems / Energy & Sustainability / PM, Design & Execution**

**Dr. Axel Laistner**

**XI-AERO** Association  
Coordinator

**axel laistner consulting**

Rosenstr. 6 – 73466 Lauchheim - Germany

+49 (7363) 816580
