

SUSTAINABILITY IN AVIATION & AIRPORTS

- ➡ save on recurring energy costs
- ➡ stabilize your energy buying prices
- ➡ motivate & integrate your staff & users
- ➡ be a positive leader for related partners
- ➡ improve your energy & climate footprint
- ➡ create an optimized CAPEX-OPEX balance

YOUR sustained success is our aim !

STRATEGY TO YOUR FUTURE

Your strategies toward sustained future success can be developed and refined drawing on our long term experience in the field.

Balancing the achievement tripod of “business – environment – society” toward sustainable corporate success uses methodologies and processes of integration and focus on the mutual benefits, strengths and synergies found therein.

Your sustainability aim will reorient and refocus your company and create industry leading performance through participant motivation and process efficiency

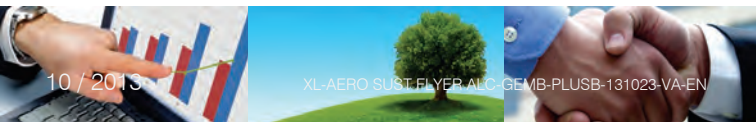

Your aviation business focus defines our assistance and input, combining expert aviation understanding with sustainability experience.

METHODS – PLANNING – CONTROLLING

Within your framework & scope definition, we develop targets as well as methods, means and projects leading to your sustained & sustainable business development

Verifiable method & process success and target controlling throughout all steps of each project are part of our unique consulting aspects & expertise.

Your instruments for continuing improvement of your sustainable performance are our focus of expertise.

you talk ⇌ we listen ⇌ we act ⇌ you benefit

SITUATION & IMPLEMENTATION

Motivation by integration of your staff, as well as other stakeholders is a key element.

Creating and shaping a "THIS IS US" / "CAN DO" environment, within your company staff and your integrated partners, is both the target and the result of the encompassing integration of many participants in the process and projects of sustainability.

Presenting your path to sustainability by professional public relations & communications, is part of our activities and will raise your corporate attractiveness and acceptance by the public and outside partners and interest groups.

Assisting you in activating the performance potentials & synergies hidden in your sustainable future with their knowledge, our
